

## **EOS AM-1 Mission Operations Review**

# **EOC TROUBLESHOOTING OVERVIEW**

**RONALD JONES**  
**Lockheed Martin Space Mission Systems**  
**Goddard Space Flight Center/Code 505**  
**Greenbelt, MD 20771 USA**  
**E-mail: [rjones@eos.hitc.com](mailto:rjones@eos.hitc.com)**

# Topics To Be Addressed

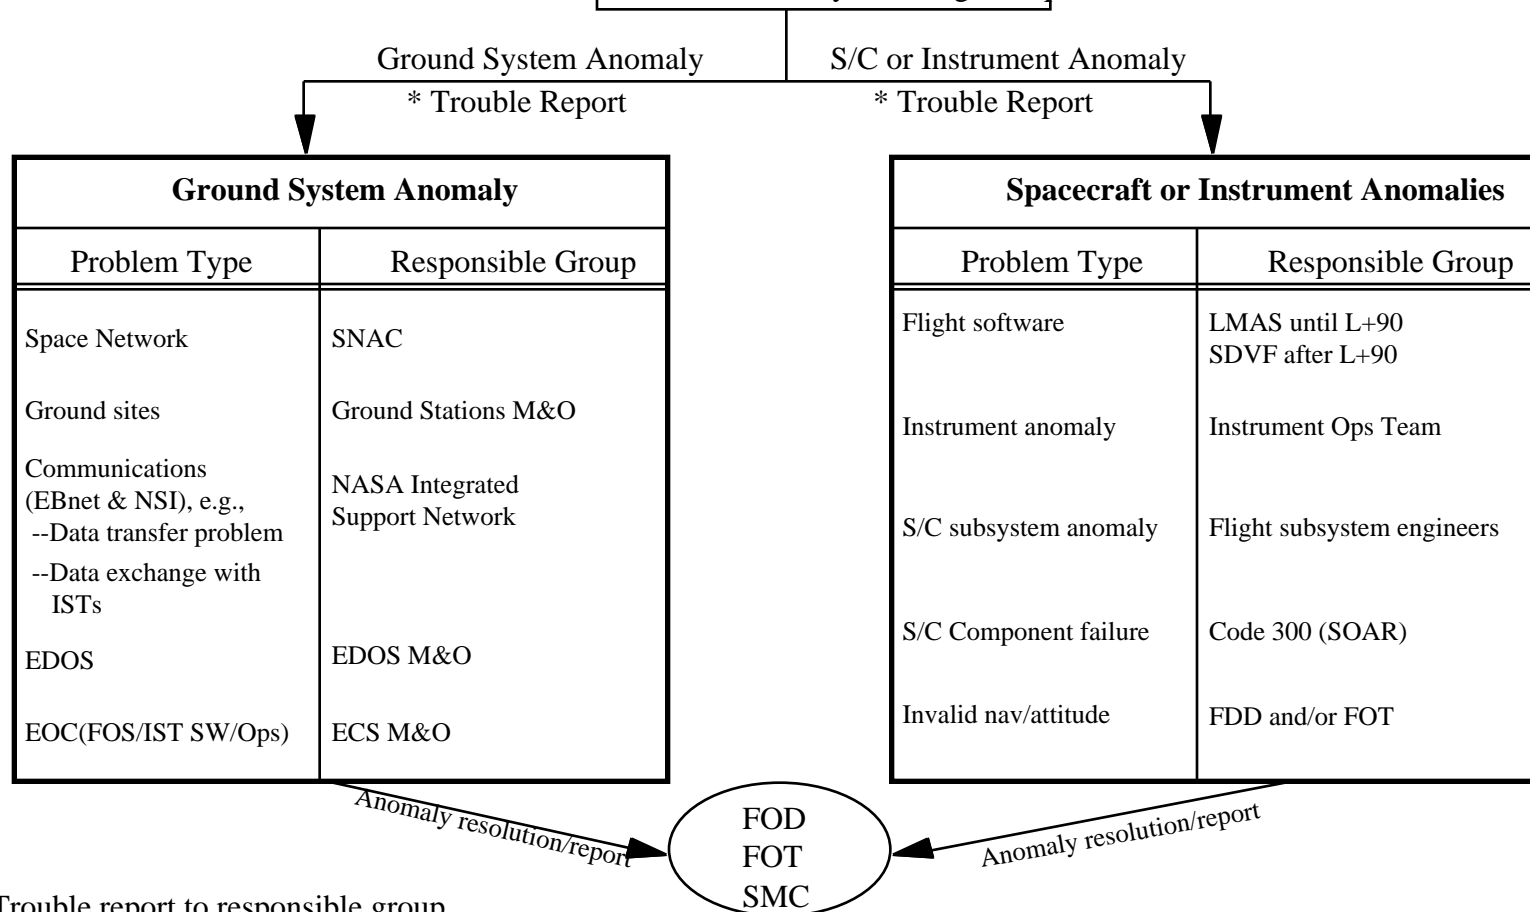

- **EOC Offline Troubleshooting**
- **EOC Online Ground Segment Troubleshooting**
- **EOC Online Space Segment Troubleshooting**

# EOC Offline Troubleshooting

- Problem Detection
- Problem Identification
- Generate Trouble Report
- Form Anomaly Working Group

\* Trouble report to responsible group

# EOC Online Ground Segment Troubleshooting

- **Spacecraft communications**
- **External interfaces, ISTs, and SMC**
- **FOS RTS failover**

# EOC Spacecraft Communications

- **EOC receives, processes, and displays status data during contact**
  - Internally from LSM for hardware and software monitoring
  - From NCC on SN performance (UPD)
  - From EDOS on EDOS performance (CODA)
    - » No status from SMC, EBnet, FDF, etc.
  - EBnet: post trouble tickets on Web server
- **If trouble with spacecraft communications, FOT contacts NCC Operations, EDOS Operations, and/or Nascom Communications Manager as appropriate to resolve problem(s)**

# EOC External Interfaces, ISTs, and SMC

- For external interfaces (e.g., FDF, EDOS)
  - EOC generates event messages for data transfer problems (e.g., problem with file transfer)
  - FOT deals directly with external interface operations personnel if applicable
- Trouble with ISTs
  - EOC receives status data from ISTs
  - Post trouble tickets on Web server
    - » IOT informs FOT of trouble
    - » Postpass FOT assist IOT in trouble resolution
- Role of SMC
  - SMC collects EOC LSM information for historical trending
  - Internal problems worked internally by FOT

# FOS Real-Time Server Failover

- Failure recovery is an automated, not automatic function
- String manager processes on two RTSs respond to direction
  - ACTIVE process statuses changed to INACTIVE
  - BACKUP process statuses changed to ACTIVE
- Users with mirrored or tailored connections will be automatically connected to new ACTIVE string

# EOC Online Space Segment Troubleshooting

- **Problem detection – Trouble with spacecraft**
  - FOS
  - FOT Online Engineer
- **Problem notification**
  - FOS generates Event Messages
    - » Telemetry out-of-limits/delta violations
    - » State Check violations
    - » SSR playback problems
    - » Activity Log entries
  - FOT Online Engineer informs Shift Supervisor
- **Recovery: FOT Online Personnel**
  - OICD/Operations Agreement
  - Preapproved Contingency Operation Procedure
    - » FOS recommends via event message
    - » FOT Online Engineer recommends to Shift Supervisor

# EOC Online Space Segment Troubleshooting (Cont'd)

- **Recovery: FOT Offline personnel**
  - **There is no preapproved COP for anomaly**
  - **Online Engineer collects data**
  - **Online Engineer informs Shift Supervisor of problem**
  - **Online Engineer calls**
    - » **FOT Manager**
    - » **FOT Flight System Manager**
    - » **FOT Operations Manager**
    - » **GSFC Flight Operations Director**
  - **FOT Flight System Manager and/or FOT Spacecraft Subsystem Engineer arrive at EOC**
    - » **Tiger Team looks at data collected by Online Engineer**
    - » **Comes up with plan of attack**
    - » **Recovers spacecraft**
